

Dry Eye Tool Box

The New Professional Dry Eye App

- **Quick and easy analysis of dry eye likelihood and evaluation of dry eye type**
- **Evidence based management recommendations for contact lens wearers and non-lens wearers**
- **Symptometer for quick dry eye screening and to measure management success**

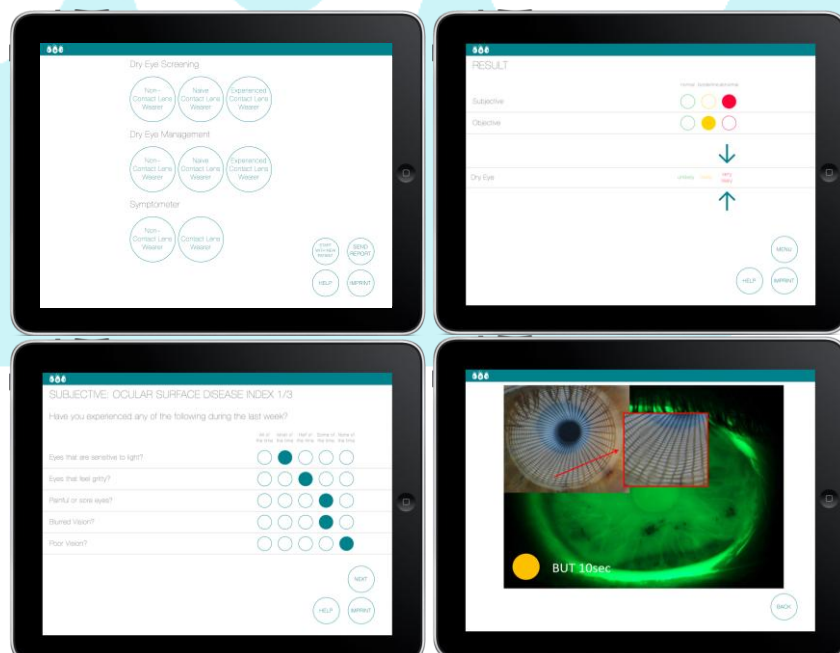

The **Dry Eye Tool Box** is an evidence based APP easily and comfortable to be used with optimal involvement of your patient in the dry eye assessment.

The Screening Module calculates dry eye risk of your patient based on subjective and objective observations. In naïve contact lens wearers, this APP can predict likelihood of later dry eye symptoms and of course the APP can analyse contact lens relevant dry eye in experienced lens wearers.

With the Dry Eye Manager this APP classifies dry eye type and give you appropriate management options for your patient and / or it lists the options to remarkable improve contact lens wearing comfort.

Use the Symptometer to measure management success based on the patient's symptoms. This also can be used as an extra quick screening module for dry eye. After 1-2 minutes you know the subjective dry eye status of your patient.

This APP leads you through an professional dry eye management scheme making dry eye evaluation and management easy and repeatable. The patient can easily be involved in this process to highlight your professionalism and improve patient loyalty and compliance.
